EXPERIENCE

Software Engineer Student Worker — Dec 2025 - Present
Intel Corporation — *Heredia, Costa Rica*

- Model hardware platforms based on architectural specifications using DML (Device Modeling Language) for pre-silicon simulation environments.
- Develop and execute automated test suites in Python to validate system configurations and functionality across platforms.
- Debug and resolve complex platform issues to maintain high simulation accuracy and environment stability.
- Maintain and streamline build and configuration processes for simulated hardware platforms.

Trip Leader Assistant — Feb 2024 - Jul 2025
Praying Pelican Missions — *Costa Rica*

- Managed logistics, transportation, and lodging for international groups of up to 60 people, handling budgets ($500 - $3000) and facilitating real-time English/Spanish translation.

Support Agent — Aug 2023 - Dec 2023
5CA Limited — *Remote, Netherlands*

- Delivered high-quality technical support, exceeding productivity benchmarks (+6 Tickets Per Hour) and customer satisfaction rates (+95% CSAT).

IT Service Desk — Oct 2021 - Dec 2021
National Instruments — *Heredia, Costa Rica*

- Resolved hardware, software, and network issues for enterprise users under strict SLA compliance and managed system security through user provisioning.

PROJECTS

Inscriptions Web Page (HimadCR.com) — March 2024 - July 2024

- Developed a full-stack web application using React, Node.js, and SQL to manage registrations, working alongside the client to design system documentation.
